COMM 535: COMMUNICATION AND LEADERSHIP
Spring 2016
Dr. Sarah E. Riforgiate
Kansas State University

TEXTBOOK:

Supplemental readings will be made available electronically.

COURSE PURPOSE AND LEARNING OUTCOMES:

This class is designed to advance your knowledge and communication skills pertaining to leadership. Throughout this class, you will be given opportunities to:

1. learn and apply theory to leaders in our local community and the larger public
2. identify and reflect on personal leadership strengths and communication behaviors
3. understand and demonstrate ethical and effective communication

Upon completion of this course, you will be able to:

1. think clearly, critically and creatively in response to communication problems
2. demonstrate the communication skills necessary to engage in personal, professional, civic and social relationships
3. analyze and evaluate verbal and nonverbal messages in differing social, political, and cultural contexts in order to assess their effectiveness

COURSE REQUIREMENTS:

Journal/Learning Portfolio (75 points): Each student will complete a journal throughout the semester to use as a tool to develop a learning portfolio. In the learning portfolio, students will be asked to demonstrate competencies obtained throughout the semester in this course.

Analysis Paper (150 Points): There will be two 4-5 page analysis papers (worth 75 points each) requiring application of course concepts with the following assignment goals:

- Demonstrate mastery of course material
- Apply course material to actual events
- Integrate and explain current research (three sources per analysis paper)
- Engage in relevant and appropriate levels of reflexivity

Local Leader Project (75 points): Leadership Teams will work together to research a local leader and present findings to the class. The project will include gathering information about the organization/group the leader is involved in and the type of people the leader leads, interviewing the leader about: communication issues, ethical principles and dilemmas, and principles of leadership that the leader follows or attempts to embody. The Leadership Team will develop a
15-minute multi-media presentation of findings, give the presentation to the whole class, and turn in presentation materials to the instructor.

**Exams (150 points):** There will be two non-cumulative exams (worth 75 points each) that will evaluate your understanding, comprehension, and mastery of the readings and class discussion. You are responsible for all material discussed in class.

**Class Participation (30 points):** Active participation also helps students develop and refine their communication skills. To be prepared to participate effectively, you should:
- Read chapters prior to the day we talk about them in class
- Ask questions that will help clarify terms or ideas you don’t understand
- Offer examples or stories that demonstrate the course concepts
- If you are not comfortable talking in class, you can participate by emailing questions or examples prior to class OR discussing class material with me in my office hours

**Class Discussion Leading (20 points):** To practice leadership skills, encourage student involvement, and enhance understanding of class readings, students will sign up to create discussion questions and lead the discussion for a selected research article. This does not mean that these students will have all the answers; rather, the students will have carefully read the content assigned, posted four to five open-ended discussion questions in advance, and will come to class prepared to lead a discussion of the article. Discussion questions must be posted 24 hours prior to the class discussion on the message board.

**TENTATIVE SCHEDULE:**

<table>
<thead>
